15th Stable Isotope Network Meeting

University of Vienna, Austria

24th & 25th November 2017

Programme
<table>
<thead>
<tr>
<th>Time</th>
<th>Event</th>
</tr>
</thead>
<tbody>
<tr>
<td>12:30 – 12:55</td>
<td>Registration</td>
</tr>
<tr>
<td>12:55 – 13:00</td>
<td>Welcome &amp; Introduction (Wolfgang Wanek)</td>
</tr>
<tr>
<td>13:00 – 13:45</td>
<td><strong>Key Note Address</strong></td>
</tr>
<tr>
<td></td>
<td>Thomas Hofstetter (Eawag, Swiss Federal Institute of Aquatic Science and Technology, Dübendorf, Switzerland)</td>
</tr>
<tr>
<td></td>
<td>New challenges for the stable isotope analysis of organic pollutant biodegradation</td>
</tr>
<tr>
<td>13:45 – 14:05</td>
<td>Jan Wiederhold (Dept. of Environmental Geosciences, University of Vienna, Austria)</td>
</tr>
<tr>
<td></td>
<td>Tracing sources and fate of mercury in soils and groundwater at industrial contamination sites with stable mercury isotopes</td>
</tr>
<tr>
<td>14:05 – 14:25</td>
<td>Christin Müller (Helmholtz Center for Environmental Research, Department Catchment Hydrology, Halle, Germany)</td>
</tr>
<tr>
<td></td>
<td>Tomography of anthropogenic nitrate contribution along mesoscale rivers in two European catchments</td>
</tr>
<tr>
<td>14:25 – 14:45</td>
<td>György Czuppon (Institute for Geological and Geochemical Institute, Hungarian Academy of Sciences, Budapest, Hungary)</td>
</tr>
<tr>
<td></td>
<td>Relationship between the air moisture source and the stable isotope composition of the precipitation in Hungary</td>
</tr>
<tr>
<td>14:45 – 15:05</td>
<td>Stefan Wyhlidal (AIT – Austrian Institute of Technology GmbH, Tulln, Austria)</td>
</tr>
<tr>
<td></td>
<td>Temporal and spatial distribution of isotopes in river water in Austria</td>
</tr>
<tr>
<td>15:05 – 15:40</td>
<td><strong>Coffee and Tea Break</strong></td>
</tr>
<tr>
<td>15:40 – 16:00</td>
<td><strong>SESSION 2</strong> Chair: Jan Wiederhold</td>
</tr>
<tr>
<td></td>
<td>Christoph Spötl (Institute of Geology, University of Innsbruck, Innsbruck, Austria)</td>
</tr>
<tr>
<td></td>
<td>Stable isotopes reveal the origin of caves</td>
</tr>
<tr>
<td>16:00 – 16:20</td>
<td>Attila Demény (Institute for Geological and Geochemical Research, Research Centre for Astronomy and Earth Sciences, Hungarian Academy of Sciences, Budapest, Hungary)</td>
</tr>
<tr>
<td></td>
<td>Middle Bronze Age humidity and temperature variations and societal changes in East-Central Europe</td>
</tr>
<tr>
<td>16:20 – 16:40</td>
<td>Anna-Lena Grauel (Godwin Laboratory for Palaeoclimate Research, Department of Earth Sciences, University of Cambridge, Cambridge, United Kingdom)</td>
</tr>
<tr>
<td></td>
<td>Magnitude of temperature change in the lowland Neotropics during the last Glacial</td>
</tr>
<tr>
<td>16:40 – 17:00</td>
<td>Kathleen A. Wendt (Institute of Geology, University of Innsbruck, Innsbruck, Austria)</td>
</tr>
<tr>
<td></td>
<td>775,000 years of climate history from the southwest USA: revamping the famous Devils Hole cave record</td>
</tr>
<tr>
<td>17:00 – 17:20</td>
<td>Zoltán Kern (Institute for Geological and Geochemical Research, Research Centre for Astronomy and Earth Sciences, Hungarian Academy of Sciences, Budapest, Hungary)</td>
</tr>
<tr>
<td></td>
<td>Stable isotope signatures in tree rings of Swiss stone pine (<em>Pinus cembra</em> L.) in Romania – annually resolved summer proxy archive for the past 600 years</td>
</tr>
<tr>
<td>17:20 – 19:00</td>
<td><strong>Poster session 1 and Stable isotope laboratory tours</strong></td>
</tr>
<tr>
<td>from 19:00</td>
<td><strong>Dinner</strong> at Brandauers Bierbögen, Heiligenstädter Straße 31, 1190 Vienna</td>
</tr>
</tbody>
</table>
SATURDAY 25th NOVEMBER 2017

SESSION 3  Chair: Albrecht Leis
09:00 – 09:45  Key Note Address
Rolf Siegwolf (Paul Scherrer Institute, Villigen, Switzerland)
Trees in a changing environment: Visualizing their responses with stable isotopes
09:45 – 10:05  Patrick Meister (Dept. for Geodynamics and Sedimentology, University of Vienna, Austria)
Carbon isotope fractionation during methanogenesis in marine sediments: An evaluation by reactive-transport modelling
10:05 – 10:25  Micha Horacek (HBLFA Francisco-Josephinum BLT, Wieselburg, Austria)
Identification of ivory with respect to animal species by stable isotopes
10:25 – 11:00  Coffee and Tea Break
11:00 – 11:20  Danijela Smajgl (GEOMAR Helmholtz Centre for Ocean Research Kiel, Kiel, Germany)
New analytical approach in monitoring of CO₂ cycle in aquatic ecosystems
11:20 – 11:40  Filip Volders (Elementar Analysensysteme GmbH, Langenselbold, Germany)
An LC-IRMS Interface for Flexible Compound-specific Stable Isotope Analysis
11:40 – 12:00  Oliver Schlegel (Air Liquide Austria GmbH, Schwechat, Austria)
Improving Measurement Reliability of Isotope Ratios
12:00 – 14:00  Lunch (on-site lunch is included in the registration fee!) and Poster session 2

SESSION 4  Chair: Stefan Wyhlidal
14:00 – 14:45  Key Note Address
Michaela Dippold (Dept. of Biogeochemistry of Agroecosystems, Georg-August University Göttingen, Germany)
From position-specific labeling to quantitative soil fluxomics - new dimensions in terrestrial biogeochemistry
14:45 – 15:05  Yuntao Hu (Dept. of Microbiology and Ecosystem Science, University of Vienna, Austria)
Multiple isotope tracing reveals the transformation processes of oligopeptides in soils
15:05 – 15:25  Zsófia Kovács (Institute of Earth Sciences, University of Graz, Austria)
The influence of pelagic calcification on the Late Triassic seawater chemistry
15:25 – 15:45  Lukasz Pytlak (Applied Geosciences and Geophysics, University of Leoben, Austria)
Light Hydrocarbon Geochemistry of Oils in the Alpine Foreland Basin: Impact of Geothermal Fluids on the Petroleum System
15:45 – 16:05  Magda Mandic (Thermo Fisher Scientific, Bremen, Germany)
Studying various processes with δ¹³C and δ¹⁸O
16:05 – 16:30  Coffee and Tea Break
16:30 –  Generalversammlung SINA - Verein für Stabile Isotopen Forschung (General assembly of the Stable Isotope Network Austria – SINA. Seminar room 'Ecology', UZA 1, Althanstr. 14, A-1090 Vienna)
POSTER SESSION 1   Friday 24th November

17:20 – 19:00

P1: Cornelia Wilske (Dept. of Catchment Hydrology, Helmholtz Centre for Environmental Research (UFZ), Halle/Saale, Germany)
Behavior of stable sulfate isotopes in a coupled Cretaceous and Quaternary aquifer system, Lower Jordan Valley

P2: Katharina Schott (AIT – Austrian Institute of Technology GmbH, Tulln, Austria)
Isotope patterns of water at different time scales in the Hydrological Open Air Laboratory (HOAL) Petzenkirchen

P3: Martin Kralik (Dept. of Environmental Geosciences, University of Vienna, Austria)
Tracing stable isotopes (δ²H and δ¹⁸O) from meteoric water to spring-groundwater in small catchments of the Vienna Woods, Vienna, Austria

P4: Stefan Wyhlidal (AIT – Austrian Institute of Technology GmbH, Tulln, Austria)
The Austrian Network of Isotopes in Precipitation (ANIP) and its application in hydrology

P5: István Gábor Hatvani (Institute for Geological and Geochemical Research, Research Centre for Astronomy and Earth Sciences, Hungarian Academy of Sciences, Budapest, Hungary)
Resampling of sedimentary proxy records to evenly spaced time-series using spectral control on the example of speleothem stable isotope records from Europe

P6: György Czuppon (Institute for Geological and Geochemical Research, Hungarian Academy of Sciences, Budapest, Hungary)
Multi-annual monitoring in the Béke and Baradla caves (NE Hungary): implications for the conditions for the formation cave carbonates

P7: Izabela Bujak (Dept. of Catchment Hydrology, Helmholtz Centre for Environmental Research (UFZ), Halle/Saale, Germany)
Multi-isotope approach to evaluate sources and fate of nitrogen in the Erlauf River catchment in Austria

P8: Vera Winde (LUBW, Institute for Lake Research, Langenargen, Germany)
Rhine river plume tracking with stable hydrogen and oxygen isotopes in Lake Constance

P9: Giorgio Höfer-Öllinger (Georesearch Forschungsgesellschaft mbH, Wals, Austria)
Stable Isotopes in Precipitation: A Case Study on Daily Analyses at Sonnblick Observatory (3.106m) and in Wals Isolab (446m), Salzburg, Austria

P10: Máté Karlik (Institute for Geological and Geochemical Research, Research Centre for Astronomy and Earth Sciences, Hungarian Academy of Sciences, Budapest, Hungary)
Natural and anthropogenic changes in a lake-forest system in South Bukovina based on stable C and N isotope ratios and lipid biomarkers since 1340 A.D.

P11: Zoltán Kern (Institute for Geological and Geochemical Research, Research Centre for Astronomy and Earth Sciences, Hungarian Academy of Sciences, Budapest, Hungary)
Establishment of the lab protocol for simultaneous determination of stable isotope composition of carbon, oxygen, and non-exchangeable hydrogen in cellulose samples using a heated vacuum-equilibration device
P12: Kathrin Schmittner (AIT – Austrian Institute of Technology GmbH, Tulln, Austria)  
Impacts of nitrogen deposition on forest biogeochemical processes across a trans-European gradient investigated using a tool kit of stable isotope methods

P13: Elisabeth Ziss (AIT – Austrian Institute of Technology GmbH, Tulln, Austria)  
Biochar: NET-2-U. Biochar: Negative Emission Technologies are nice to the environment - Using stable isotopes in a citizen science approach

P14: Andrea Watzinger (AIT – Austrian Institute of Technology GmbH, Tulln, Austria)  
Consequences of climate change for agroecosystem carbon and nitrogen cycling – an isotope labelling of green manure approach

P15: Andrea Watzinger (AIT – Austrian Institute of Technology GmbH, Tulln, Austria)  
Determination of carbon isotope enrichment factors of metabolites after precursor amendment-illustrated by the example of chlorinated ethene degradation

P16: Nora Fricko (TU Wien, Institute for Water Quality, Resource and Waste Management, Vienna, Austria)  
Project MINTOx – Microbial nitrogen transformation processes during waste degradation

P17: Micha Horacek (HBLFA Francisco-Josephinum BLT, Wieselburg, Austria)  
Imported or already locally native? Stable isotope investigation of invasive tree pests can differentiate between pests grown in local trees (Austria) from pests grown elsewhere: a pilot study of Monochamus

P18: Ingrid Rabitsch (Dept. of Forestry and Soil Science, University of Natural Resources and Life Sciences, Vienna, Austria)  
Impacts of habitat changes on food availability for the Warbler finch in the Scalesia Forest, Galápagos

P19: Jan Wiederhold (Dept. of Environmental Geosciences, University of Vienna, Austria)  
Tracing Hg transformations in contaminated soil using Hg isotopes

P20: Jan Wiederhold (Dept. of Environmental Geosciences, University of Vienna, Austria)  
Hg isotope analysis and sequential extractions of industrially contaminated soils in Valais, Switzerland
List of email addresses of participants

- Ralf Benischke, Graz University of Technology, Institute of Applied Geosciences, Graz, Austria
  ralf.benischke@tugraz.at

- Izabela Bujak, Helmholtz-Centre for Environmental Research - UFZ, Department Catchment Hydrology, Halle/Saale, Germany
  izabela.bujak@ufz.de

- Alberto Canarini, University of Vienna, Department of Micobiology and Ecosystem Science, Vienna, Austria
  alberto.canarini@univie.ac.at

- György Czuppon, Hungarian Academy of Sciences, Budapest, Institute for Geological and Geochemical Research, Budapest, Hungary
  czuppon@geochem.hu

- Attila Demény, Hungarian Academy of Sciences, Budapest, Institute for Geological and Geochemical Research, Budapest, Hungary
  demeny@geochem.hu

- Michaela Dippold, Georg-August University Göttingen, Department of Biogeochemistry of Agroecosystems, Göttingen, Germany
  dippold@gwdg.de

- Nora Fricko, TU Wien, Institute for Water Quality, Resource and Waste Management, Vienna, Austria
  nora.fricko@tuwien.ac.at

- Anna-Lena Grauel, Graz University of Technology, Institute of Applied Geosciences, Graz, Austria
  grauelanna@gmail.com

- István Gábor Hatvani, Hungarian Academy of Sciences, Budapest, Institute for Geological and Geochemical Research, Budapest, Hungary
  hatvaniig@gmail.com

- Giorgio Höfer-Öllinger, Georesearch Forschungsgesellschaft mbH, Wals, Austria
  giorgio.hoefer-oeillinger@geoconsult.eu

- Thomas Hofstetter, Eawag, Swiss Federal Institute of Aquatic Science and Technology, Dübendorf, Switzerland
  Thomas.Hofstetter@eawag.ch

- Rebecca Hood Nowotny, AIT – Austrian Institute of Technology GmbH, Tulln, Austria
  Rebecca.Hood.fl@ait.ac.at

- Micha Horacek, HBLFA Francisco-Josephinum BLT, Wieselburg, Austria
  micha.horacek@josephinum.at

- Balázs Horváth, Imprint Analytics GmbH, Neutal, Austria
  horvath@imprint-analytics.at

- Yuntao Hu, University of Vienna, Department of Micobiology and Ecosystem Science, Vienna, Austria
  yuntao.hu@univie.ac.at

- Máté Karlik, Hungarian Academy of Sciences, Budapest, Institute for Geological and Geochemical Research, Budapest, Hungary
  karlikmate@gmail.com

- Martin Kralik, Department of Environmental Geosciences, University of Vienna, Vienna, Austria
  martin.kralik@univie.ac.at

- Zoltan Kern, Hungarian Academy of Sciences, Budapest, Institute for Geological and Geochemical Research, Budapest, Hungary
  zoltan.kern@gmail.com

- Zsofia Kovacs, Institute of Earth Sciences, University of Graz, Graz, Austria
  zsofia.kovacs@uni-graz.at

- Albrecht Leis, JR-AquaConSol GmbH, Graz, Austria
  albrecht.leis@jr-aquaconsol.at
lecture room 2, HS 2
main entrance UZA 1
footpath, public transport
Hotel ANA Gala Vienna
footpath from Hotel
Sponsored by:

Thermo Fisher Scientific - Wehlistrasse 27b/1, A-1200 Wien, Austria
Elementar Analysensysteme GmbH - Elementar Strasse 1, D-63505 Langenselbold, Germany
IVA Analysentechnik - Alte Seilerei Haus 5, Meerbuscher Str. 64-78, D-40670 Meerbusch, Germany
Air Liquide Austria GmbH – Sendnergasse 30, A-2320 Schwechat, Austria
